

# Test Developer Cover Letter

862 Jerde ViewsMarlonberg, AR 38390

**Dear Quinn Schmeler,**

In response to your job posting for test developer, I am including this letter and my resume for your review.

In my previous role, I was responsible for intermediate knowledge of Python (ability to read, write in Python).

Please consider my experience and qualifications for this position:

- Professional experience working on a Unix/Linux
- Able to take on responsibility and work independently
- Experience with SQL DBs
- Experience and proficiency working with Git/GitHub
- Experience working as part of a highly distributed team
- A demonstrated understanding of the development lifecycle and how SDET fits into the process
- A demonstrated understanding of front-end and back-end technologies and how they fit together
- Professional experience in JS frameworks such as Angular, React, Backbone, Knockout

**Thank you in advance for taking the time to read my cover letter and to review my resume.**

Sincerely,

Onyx Buckridge
