

# Test Developer Cover Letter

56674 Winston Motorway Lockmanchester, WV 55730

**Dear Lennox Yost,**

I submit this application to express my sincere interest in the test developer position.

Previously, I was responsible for a logical, methodical approach to optimize system design including hardware, software, facilities, personnel, and support equipment.

My experience is an excellent fit for the list of requirements in this job:

- Extensive experience in Java, REST, Spring, J2E and Junit
- Experience in Agile Development and/or Test Driven Development (TDD)
- Strong background in programming languages like C++, C#, Python, Java
- Professional database experience in at least SQL databases such as Postgres, MySQL
- Attention to detail and excellent communication/documentation skills
- Amazon Web Services (AWS), Azure
- Experience in test automation design and development
- Familiarity with testing frameworks like MSTest, NUnit, RSpec

**I really appreciate you taking the time to review my application for the position of test developer.**

Sincerely,

Alexis Ebert
