

Test Developer Cover Letter

36225 Vincent KeyLake Rogerland, LA 46479-8257

Dear Haven Koelpin,

I am excited to be applying for the position of test developer. Please accept this letter and the attached resume as my interest in this position.

Previously, I was responsible for administrative and/or functional supervision over assigned staff that configure applications, write program code or scripts.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- In-depth experience with test planning, test case creation and test case execution
- Experience with requirements reviews with developers and other stakeholders such as product owners
- Knowledge of scrum development practices and how they pertain to test needs
- Strong automation scripting skills including Python, Selenium, and J-Meter
- Experience working in a CI or DevOps based environment
- Black box and white box testing on web based and embedded systems
- Creation, maintenance and execution of test plans directly from user stories
- Testing of Windows and Web based UI's

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Morgan Hintz
