

Test Developer Cover Letter

59012 Larry Road West Tyson, MI 61115

Dear Armani Predovic,

I am excited to be applying for the position of test developer. Please accept this letter and the attached resume as my interest in this position.

In my previous role, I was responsible for intermediate knowledge of cloud monitoring and alerting, and basic knowledge of Golang (read language, prefer ability to write GO).

Please consider my qualifications and experience:

- Proficient in at least one object-oriented programming language (Java, Python, C#)
- Proficient at scripting in languages
- The design, development and maintenance of complex automation and custom test tools
- Establishing an automation test coverage strategy that supports the logistics system design specifications and the implementation of systems throughout the entire software development life cycle
- An awareness of evolving technologies in use by other teams at Expeditors and in the technology industry as a whole
- Excellent technical and interpersonal skills to lead, coach and mentor other project team members in order to execute the strategy
- Strong technical leadership in designing and implementing test automation
- Experience with developing test tools & test automation from scratch

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Alexis Armstrong
