

# Test Engineer Software Cover Letter

3699 Bradley Vista, Vancouver, CA 13462

**Dear Onyx Nikolaus,**

Please consider me for the test engineer software opportunity. I am including my resume that lists my qualifications and experience.

In the previous role, I was responsible for design for test feedback and requirements to the product team during the design development to assure testability and test coverage.

My experience is an excellent fit for the list of requirements in this job:

- Hands on experience with mobile apps on any of the platforms - Windows, Android or iOS
- Creative and passionate about finding new ways to discover software bugs
- Debugging issues with divide and conquer, compare and contrast, process of elimination
- Automation tools such as Renorex, Coded UI
- Firmware testing
- Familiar with front-end technologies, REST web services and/or Databases
- Experience applying different software testing techniques, such as equivalence class partitioning, boundary value testing, pairwise testing, etc
- Protractor JS / Angular

**I really appreciate you taking the time to review my application for the position of test engineer software.**

Sincerely,

Emerson Gottlieb
