Test Engineer Software Cover Letter

4228 Champlin HillsPearleneside, KS 17464-3418

Dear Denver Bernier,

Please consider me for the test engineer software opportunity. I am including my resume that lists my qualifications and experience.

In my previous role, I was responsible for systems Test and Evaluation (T&E) support to the NMMES-TR Program and related Integrated Product Teams (IPTs).

Please consider my qualifications and experience:

- General proficiency in a Linux environment
- Able to write basic queries in SQL Server
- Experience in complete Software Development Life cycle (SDLC) including Requirement, Analysis, estimations, Design, Unit and System Testing and Release
- Proven expertise in developing integration and API level testing of .Net components, REST based services
- Experience with test automation tools, such as Nunit, MsTest, SpecFlow
- Experience in working with CI/Dev Ops tools for testing components
- XML, HTML, JavaScript, or CSS skills
- Experience working with web-delivered application architectures

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Armani O'Conner
