

Test Engineer Software Cover Letter

863 Rath Place
South Alita, MA 73135

Dear River Lynch,

I am excited to be applying for the position of test engineer software. Please accept this letter and the attached resume as my interest in this position.

In the previous role, I was responsible for test support working with various engineering teams (Program Management, Design, Applications, Product Engineering, FA and Reliability) throughout product development phase.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Experience in test case development, test execution, test management, test status reporting
- Financial Software Engineering
- JavaScript, HTML 5, .NET (C#), C++, Windows
- Worked in any Software Development Life Cycle model and desirable working in Agile environment
- Experience with THAAD
- Experience with CDLIM
- Experience with testing SaaS, PaaS, Cloud, or Web-based apps in various browsers on Mac and Windows systems
- Experience with discovering show stopper bugs and finding reproduction steps to crashes

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Ryan Funk
