

# Test Engineer Software Cover Letter

3798 Adams ParkwayMurrayland, NM 90987-9699

**Dear Denver Rempel,**

Please consider me for the test engineer software opportunity. I am including my resume that lists my qualifications and experience.

In the previous role, I was responsible for technical design and architecture advice to internal teams on how to securely develop and build applications and supporting systems.

Please consider my experience and qualifications for this position:

- Strong experience with JAVA or Python
- Experienced software tester, preferably within large scale backend systems
- Familiarity with manual/exploratory testing
- Theoretical knowledge of test techniques, from ISTQB or similar certifications (however certification is not a requirement itself)
- Experience with Continuous Integration Jenkins, TeamCity
- A good understanding of the software development lifecycle with particular emphasis on quality and testing methodologies
- Experience of working in a cross functional team environment
- Have a good understanding of the software development lifecycle with particular emphasis on quality and testing methodologies

**Thank you in advance for reviewing my candidacy for this position.**

Sincerely,

Haven Doyle
