

Test-Integration Cover Letter

2385 Florentino PrairieEast Cleotide, VA 83585-3633

Dear Charlie Kuhn,

I submit this application to express my sincere interest in the test-integration position.

In my previous role, I was responsible for direct support to Test Management for pre-ship reviews to ensure that the engine hardware assembly satisfies system level requirements prior to F9 integration.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Excellent written and oral communications and teaming skills preferred
- Experience working as part of a broader, global team preferred
- Bachelor/Masters in Computer Science, Systems Engineering, Information Technology or closely related field
- SOAP and RESTFUL experience
- Microsoft SQL Server, Oracle, Salesforce NICE TO HAVE
- Understanding of SaaS third party applications
- Participated in vendor/software selection process
- Defining IT testing strategies, testing framework and quality assurance processes and standards

I really appreciate you taking the time to review my application for the position of test-integration.

Sincerely,

River Gutmann
