

Testing Engineer Cover Letter

8501 Mckinley ClubAntonettatown, FL 99718

Dear Rowan Considine,

I submit this application to express my sincere interest in the testing engineer position.

Previously, I was responsible for expert advice and coordination of mission operations, launch and initialization, end to end mission system testing, ground architecture, systems engineering, systems integration, and deployment related to the satellite ground system.

Please consider my experience and qualifications for this position:

- Working knowledge of Vector and dSPACE toolsets
- Experience in using UI testing tool
- Experience in working on some object oriented programming language
- Experience Scripting languages like VBScripting
- At least some basic knowledge of the theory of electrical machines
- Java programing capabilities
- Experience in contributing to QA Test Strategy and providing QA Estimation
- Experience of creating daily, weekly and release test execution and defect reports

I really appreciate you taking the time to review my application for the position of testing engineer.

Sincerely,

Landry Lakin
