Dear Armani Zboncak,

I am excited to be applying for the position of testing senior manager. Please accept this letter and the attached resume as my interest in this position.

In my previous role, I was responsible for strategy and guidance for testing automation, being responsible to maintain and enhance testing automation throughout the region.

My experience is an excellent fit for the list of requirements in this job:

- Excellent investigative skills to identify and source external theories
- Strong understanding of software defined lifecycle, testing methodologies, Agile or Scrum methodology
- Creative strategic thinker with excellent executive communications, facilitation and relationship building skills
- Experience of the SaaS industry and SaaS product introductions
- Energetic, Flexible and resilient, adaptable to a high-change environment and open to new concepts and/or processes
- Lead overall end-to-end equipment technology testing to move through ideation, development, conceptual design and detail design
- Have proven experience to develop and test mechanical – robotics – logistics – packing equipment working with equipment suppliers, laboratories and manufacturing plants
- Proven technical leadership experience in development, testing and implementation of large scale, complex projects

Thank you for your time and consideration.

Sincerely,

Spencer Russel
