Dear Sawyer Nikolaus,

I submit this application to express my sincere interest in the user acceptance tester position.

In my previous role, I was responsible for appropriate detail to document issue for the development team and context regarding impact and priority.

Please consider my experience and qualifications for this position:

- Reviewing the test coverage and test cases produced by the Test Analysts and as appropriate conduct walkthroughs with respective Business Stakeholders
- Tracking, control and resolution of testing issues and queries
- Executes test cases as per the agreed testing plan, log and retest defects as necessary using the appropriate test tools
- Assists with Root Cause Analysis and troubleshooting of defects
- Test data definition
- Ensures test environments are set up and available
- Work allocation and tracking progress for Test Analysts
- Highlighting any Risks or Slippages to the Test Manager

Thank you for your time and consideration.

Sincerely,

Justice McKenzie
