

# User Experience Architect Cover Letter

3965 Schmitt RadialSouth Otelia, OH 66557-9751

**Dear Cameron Johnston,**

In response to your job posting for user experience architect, I am including this letter and my resume for your review.

In my previous role, I was responsible for uX leadership and operational direction in overseeing the interface development of UX aspects of web, mobile, and cross channel experience design.

Please consider my experience and qualifications for this position:

- Work with experts in content strategy, design, interaction and user research
- Attend guest lectures and seminars from industry thought leaders
- Team fun, such as cooking competitions
- Our managers believe in servant leadership, and act as player-coaches
- Solid experience employing a variety of user-centered iterative design methodologies and objective evaluation techniques (e.g., requirements visualization, participatory design, contextual inquiry, rapid contextual design)
- Development of organizational / structural concepts for web sites
- Processes for the development of large scale web site projects
- Highly creative and inquisitive

**Thank you in advance for taking the time to read my cover letter and to review my resume.**

Sincerely,

Charlie Osinski
