

# User Experience Architect Cover Letter

578 Mueller LightsWest Kendall, NJ 85818

**Dear Hayden Ruecker,**

I am excited to be applying for the position of user experience architect. Please accept this letter and the attached resume as my interest in this position.

In my previous role, I was responsible for full support to clients throughout the lifecycle of the teams' activities (Design, Build, Test and Implementation).

Please consider my qualifications and experience:

- Deep understanding of the storage solutions and data centers environments that are ensuring the flow of data across the world
- Proficient in planning and conducting user testing on different platforms, analyzing the outcome and providing solutions/directions for the UX team
- Develop, evolve, and maintain user experience standards and guidelines working with the appropriate AIS teams
- Participate in AIS Architecture Review Board, and product design reviews
- Experience in Human Factors / Centered Design and Information Architecture
- Experience in UX design for various smart platform technology devices, wearable technologies
- Experience in creating architectures that are scalable with optimal system performance
- Promote standard approach and engage, as appropriate, based on product complexity, for cross-functional design sessions between Experience teams and other functional stakeholders

**Thank you for your time and consideration.**

Sincerely,

Stevie Veum
