

User Experience Architect Cover Letter

7443 Champlin Freeway
Cornell
Chester, UT 37604

Dear Rory Bayer,

In response to your job posting for user experience architect, I am including this letter and my resume for your review.

In the previous role, I was responsible for interactive solutions to customer groups for validation and feedback to continually improve current and future design.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Good working knowledge of architectural and IT operational concepts, strategies, standards and policies
- Well versed in working with various product delivery methodologies like Waterfall, Agile (Scrum, XP, Kanban)
- Experience in working with ITIL/ITSM tools to support Release management, incident reporting and response, deployment management
- Conceptual knowledge of DevOps frameworks
- Experience with a wide breadth of UX methodologies
- Experience applying qualitative and quantitative data analysis techniques to improve and enhance site, and using site usage data in creating website revisions or enhancements
- Deep background in UI/interaction design
- Development of Design Systems preferably in an enterprise setting

Thank you for considering me to become a member of your team.

Sincerely,

Blake Herzog
