

# Visual Designer Cover Letter

646 Carlotta MountSouth Laronda, HI 26878-1351

**Dear Frankie Schuppe,**

In response to your job posting for visual designer, I am including this letter and my resume for your review.

In my previous role, I was responsible for recommendations to various lines of business on best practices and standardization in implementing and leveraging processes within the Atlassian Suite.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Have a Portfolio or samples of work demonstrating skills and approach to user-centered design fluency in best practices
- A solid working knowledge of the latest versions of applicable programs -- Mac OS, Adobe Creative tools, Sketch, Omnigraffle
- Experience in financial services (application design, research portals, trading applications, portfolio construction and management tools) is a bonus but not a pre-requisite
- Demonstrate world-class execution of innovative and effective digital communications and interface design experiences across all digital platforms
- Take personal responsibility for on-time deliverables and expertly crafted design that comply with style guides and standards
- Produce final visual artifacts and detailed specifications for fast implementation by development
- Knowing the tools – Good CSS and HTML skills
- Experience in design of web clients and responsive, reusable user interface designs

**Thank you for taking your time to review my application.**

Sincerely,
