

Web Admin Cover Letter

469 Klocko Highway Uptonchester, HI 86418

Dear Story Schulist,

I submit this application to express my sincere interest in the web admin position.

In my previous role, I was responsible for the customer with a secure web-based application with support and maintenance distribution drop box-like file-share on the Internet.

Please consider my experience and qualifications for this position:

- Experience in internet fundamentals related to web servers, application servers, internet security and other internet technologies
- Thorough knowledge and understanding of network and operating system principles
- Thorough knowledge in core functions related to internet infrastructure design and/or web administration
- BBA, MIS or BS in Computer Science, Electrical Engineering, MIS, or related field
- Intimate knowledge of HTTP/HTTPs protocols, and strong familiarity with other Internet protocols
- Understanding of TCP/IP networking, routing, DNS, and directory services (LDAP/AD)
- Expert scripting skills (Bash shell scripting, Python, or others)
- Understanding of Web security and application concepts and practices

I really appreciate you taking the time to review my application for the position of web admin.

Sincerely,

Haven Schulist
