

# Web Application Cover Letter

89439 Rodriguez Islelsidroville, LA 00714-0967

**Dear Emerson Heathcote,**

I submit this application to express my sincere interest in the web application position.

Previously, I was responsible for task management and support in the prioritisation of tickets and projects for existing Web Operations team.

Please consider my qualifications and experience:

- Experience in the application of various testing methods and tools
- Experience with the Microsoft suite of Office products, Team Foundation Server (TFS) or Visual Studio Team Services (VSTS)
- Experience in testing multi-tiered applications
- Comfortable with working in both Windows client-server and Web-based development in separate QA and production environments
- Excellent organization, communication, and team collaboration skills
- Understanding of the SDLC processes as they pertain to testing
- Exposure to or experience with USAF / Aircrew Training and Flying Operations
- Experience in converting manual test cases into automated test sequences

**Thank you in advance for taking the time to read my cover letter and to review my resume.**

Sincerely,

Corey Gislason
