

Web Application Cover Letter

82613 Kemmer HeightsRaynorborough, AR 94839-9520

Dear Spencer Collier,

In response to your job posting for web application, I am including this letter and my resume for your review.

Previously, I was responsible for web application support in incident and problem resolution in line with ITIL best practices through both our IT Support Help Desk and Equiniti Contact Centre teams.

My experience is an excellent fit for the list of requirements in this job:

- Full-Stack- .NET developer deep knowledge in .NET 3.5, 4.0, C#, WCF 3.5, Oracle Database
- Experience with Web Services (SOAP, REST & WCF-based), writing server side code for high performance and highly available web sites
- Experience using Visual Studio, TFS, IIS, Filezilla, Putty and other tools
- Familiar with Apache web servers in a LAMP environment
- Interest in, or hands-on experience with Machine Learning and or Data Science
- Experience developing JavaScript applications leveraging modular code design, techniques and tools (ES6, Babel, Browserify, Webpack)
- Familiarity with modern web application backends (.NET MVC, Rails, NodeJS)
- Strong native JavaScript with an emphasis in ECMAScript 6 and experience in node, Angular 1.*, 2 or 4 or other similar JS frameworks preferred

Thank you for considering me to become a member of your team.

Sincerely,

Lennox Nicolas
