

Web Applications Developer Cover Letter

592 Huels CurveGuadalupeberg, RI 81580-5895

Dear Campbell Kirlin,

I am excited to be applying for the position of web applications developer. Please accept this letter and the attached resume as my interest in this position.

In my previous role, I was responsible for technical consultation and support in the development of ETL applications and programs for data warehousing class of systems.

Please consider my experience and qualifications for this position:

- Experience using REST and web service endpoints to create secure web applications
- Experience writing tests for testing web applications
- Experience developing web applications using ArcGIS API for JavaScript or other JavaScript mapping APIs
- Turnaround enterprise Web application that requires graphical user interface services and database back
- Scrum team environment to design, develop, test, and maintain training and records management systems, similar to the systems requirements of a university
- An understanding of tiered distributed systems
- Translate customer requirements into technical designs and Adobe AEM specific implementation specifications
- Work as part of a project team along with other application developers during software design and build

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Onyx Senger
