

Web Applications Developer Cover Letter

24536 Jeremy ViaNaderburgh, SC 88906-6934

Dear Story Moore,

I submit this application to express my sincere interest in the web applications developer position.

In my previous role, I was responsible for direction in the development and maintenance of solutions as well as participates in various phases of the development life cycle.

Please consider my experience and qualifications for this position:

- Experience/understanding of hospital contracting
- Experience/understanding of health insurance business
- Experience creating a fully functional web based application in C#
- Experience in Server side web based development (J2EE, php, Rails,) is an added bonus
- Knowledge of XML, XSD and XSL
- Basic understanding of the concepts of n-tier application design patterns
- Basic understanding of utilizing ORMs for database connections and either Microsoft, Oracle, or ANSI SQL
- Basic understanding of building fully automated unit tests

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Tatum Jacobs
