

Web Applications Developer Cover Letter

847 Ortiz GrovesPort Nickside, HI 97706-7648

Dear Zion Lemke,

In response to your job posting for web applications developer, I am including this letter and my resume for your review.

In my previous role, I was responsible for analysis and development support for existing Student Information System applications by researching, updating, testing, debugging, and maintaining changes and enhancements to existing applications as needed so they comply with the ongoing business needs of the Registrar.

My experience is an excellent fit for the list of requirements in this job:

- RxJS experience preferred
- Expert in coding HTML/HTML5 and CSS/CSS3 with emphasis on Bootstrap
- Knowledge of healthcare operation and billing applications is preferred
- Strong understanding of SDLC and development practices
- Proven knowledge of MS SQL Server, ASP.NET (including MVC framework), VB, HTML, XML, CSS, JavaScript, and relevant technologies
- Knowledge of MS Active Directory Administration is preferred
- Strong understanding of data warehouse, business analysis/reporting application(s) is preferred
- Keen attention to detail and proven analytical and problem-solving abilities

Thank you for your time and consideration.

Sincerely,

Riley Schneider
