

Windows Server Administrator Cover Letter

76859 Pat EstatesLake Cammy, MT 90666

Dear Ari Lowe,

I submit this application to express my sincere interest in the windows server administrator position.

Previously, I was responsible for daily user support, troubleshooting, setup and configure MS Windows 7 Professional desktops, laptops, hardware and software troubleshooting, Norton Ghost, Symantec Endpoint Protection, backup and recovery.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Familiarity with basic enterprise storage technologies including SAN/NAS, backups
- Knowledge of installations for security patches, functional patches, and version upgrades
- Demonstrate constant consideration of risks and impacts especially with regards to changes such as security patching
- Experience working within an ITIL-driven change management environment
- Support, maintain, troubleshoot, install, configure, and upgrade multiple operating systems to include a mixture of Windows, storage, and network
- MCSA or MCSE
- Software deployment on Windows Servers
- Exposure to storage networks

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Haven Fay
