

# WordPress Developer Cover Letter

16972 Brain GardensMarquardtborough, OK 01015-0038

**Dear Ryan O'Hara,**

In response to your job posting for wordpress developer, I am including this letter and my resume for your review.

Previously, I was responsible for software design, build, test, integration, and deployment of the software baseline.

Please consider my experience and qualifications for this position:

- Knowledge of HTML and/or client-side web development scripting languages
- Use of distributed version control systems and code management systems such as Git and BitBucket
- Understanding of basic computer science algorithms and data structures
- Extensive experience working with project-based teams
- Significant experience with PHP, Javascript, and the newest HTML and CSS standards
- Significant experience developing for WordPress or CMS
- Experience with CSS preprocessors, such as Sass
- Experience using taskrunners, such as Grunt

**Thank you for your time and consideration.**

Sincerely,

Charlie Schowalter
