

Example of Analytical Consultant Job Description

Powered by www.VelvetJobs.com

Our growing company is searching for experienced candidates for the position of analytical consultant. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for analytical consultant

- Lead role in delivery of consulting projects, including assessment, scoping, estimating, validation and pricing
- Work independently or as part of a team on complex projects from beginning to end
- Analyze and interpret large amounts of global data assets, and articulate business insight in a clear and consistent manner
- Providing support and training services for projects that contain an analytical or data visualization component
- Serving as technical lead on projects
- Provide research, analytical, and writing support for the development of health and development policy guidance, issue briefs, stakeholder and project mappings, talking points, concept notes and other documents, including those related to non-communicable diseases, tobacco control, environment/climate change, disability rights, urbanization, anti-corruption, health governance, health procurement, among others
- Perform data collection and analyses of specific health and development issues in the Asia-Pacific region to help strengthen evidence-informed decision-making, programming and advocacy
- Support the organization of the team's activities, including communication, organizational, and partnership support
- Identify opportunities to mobilize resources and develop proposals
- Understand and apply machine learning and data mining techniques

Qualifications for analytical consultant

- Theoretical, conceptual and practical understanding of analytics and analytical methodologies technologies used in support of providing analytical capabilities
- Programming skills with languages including SQL, Java, Java script, Python, C
- Provide statistical assistance for statistical consulting sessions
- Support data acquisition, validation, and management from incoming data sources
- Work closely with clients in defining media for transferring data and loading data onto company systems for analyses
- Can travel as business requirements dictate at management discretion
