Our company is growing rapidly and is looking to fill the role of architect / developer. Thank you in advance for taking a look at the list of responsibilities and qualifications. We look forward to reviewing your resume.

Responsibilities for architect / developer

- Lead Automation Sub-Practice with the goal of preparing consultants to guide clients through the design and implementation of automation solutions using Automation Anywhere, UiPath, and Work Fusion RPA
- Set-up Automation Anywhere, UiPath, and Work Fusion development infrastructure to support process automation across multiple clients and numerous lines of business
- Identify and manage resource needs across sub-practice
- Contribute to the development of governance, methodologies and procedures to continually improve a rapid and repeatable delivery channel for Automation Anywhere, UiPath, and Work Fusion Sub-Practice and Automaton Delivery Team
- Work with clients, across financial services and insurance, to design automation solutions using major automation software tools
- Work with Business Analysts and users on translating integration requirements into technical design documents
- Architect solutions and enforce best practice and standards
- Design, develop and implement integration solutions with high performance, exception handling and low maintenance
- Conduct root cause analysis and provide solutions for production and development issues
- Must be knowledgeable in design, development, implementation, and testing of .NET technologies

- Technical expertise working with Salesforce.com and with systems integration in an SAP environment, preferred
- Salesforce.com certification(s) (Force.com Certified Developer) strongly desired, though we will support you on attaining these certifications throughout your career
- Familiar with relational databases
- Knowledge of shop floor data collection systems (including PLCs, OPC)
- In-depth knowledge of Master Data Management (Hyperion MDM/DRM or related technologies SAP MDM, IBM WebSphere MDM, Oracle Data Hub)
- Expert level programming experience in Python or equivalent
