

# Example of Associate Application Developer Job Description

Powered by [www.VelvetJobs.com](http://www.VelvetJobs.com)

Our company is looking for an associate application developer. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

## Responsibilities for associate application developer

- Create detailed Unit Test cases, perform unit testing, integration testing, support QA and User acceptance testing and also address ad hoc user queries
- Closely work with the users to understand the business and non-business requirements and document the technical specifications
- Analyze programs and troubleshoot production issues
- Collaborate with regional and global team members from other regions
- Performs coding to written technical specifications and standards
- Investigates, analyzes and documents reported defects
- Keeps current with software development trends, makes suggestions and takes action on IT-related best practices, processes and systems

## Qualifications for associate application developer

- Programming expertise in Core Java, Oracle
- Experience with Dot Net and at least one scripting language
- Desire to work in an Agile team (Scrum or Kanban utilising TDD, BDD, CI, pair programming )
- NoSql (preferably Marklogic)
- Expertise of JavaScript frameworks & libraries – ReactJS strongly preferred and/or AngularJS and JQuery
