

Example of Associate, Research Job Description

Powered by www.VelvetJobs.com

Our company is growing rapidly and is looking for an associate, research. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for associate, research

- Prepare next generation sequencing libraries and run sequencers
- Conduct flow sorting experiments
- Conduct basic data analysis and prepare reports and/or presentations to summarize findings
- Provide feedback of early product prototype to the product development team
- Collaborate effectively with other employees to help advance the company's research and development and commercial goals
- The candidate will have experience handling and processing fragile proteins such as enzymes and antibodies, completing reagent optimization, and establishing performance specifications
- This candidate will be involved in aspects of assay development including design of unique nucleic acid isolation methods for different specimen types, sample preparation, reagent formulation, optimization of highly multiplexed, real-time PCR and RT-PCR assays, completion of verification studies, validation of test methods, and systems integration
- The position involves working closely with team members enabling others to meet timelines successfully
- This position requires a self-driven and flexible contributor who can allocate time and resources efficiently, effectively prioritize, and continually seek ways to improve individual and corporate efficiency
- Execute corn yield trials in Turkey to generate good quality data to support

Qualifications for associate, research

- Ability to write clearly about data-driven trends, consumer and business-to-business markets, and the larger tech industry
- Diligence and persistence in researching
- A degree of comfort with Excel is required
- Solid grounding in business analysis fundamentals
- Internships in market/consumer research, consulting, tech research, or relevant experience in a similar position is helpful but not required
- Recent coursework in survey methodology, research methodology, and research analysis
