

Example of Astronaut Job Description

Powered by www.VelvetJobs.com

Our company is growing rapidly and is looking to fill the role of astronaut. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for astronaut

- Technical knowledge of spacecraft systems and operations
- Knowledge of basic orbital mechanics
- Strong written and verbal communication of technical information
- Ability to thrive under pressure and be resilient in the face of technical challenges
- Ability to decompose ambiguous tasks into tangible and measurable intermediate goals
- Insatiable hunger for continuous improvement and innovation

Qualifications for astronaut

- Ability to leverage leadership and facilitator skills to collaborate with mission partners to develop schedules, goals, objectives, and measures of performance for development tests
- Experience with coordinating personnel recovery or rescue planning with a Personnel Recovery Coordination Cell, Joint Personnel Recovery Center, or Rescue Coordination Center
- 5+ years of experience in engineering test, integration, or flight operations for complex systems (industry internships and project teams qualify)
- Real time operations experience on a complex system that has high consequences in the event of failure (such as pilot, flight test engineer, spacecraft operator, high performance automotive)

- 2+ years of experience independently owning large projects and leading interdisciplinary teams
