

Example of Business Development Operations Job Description

Powered by www.VelvetJobs.com

Our innovative and growing company is looking to fill the role of business development operations. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for business development operations

- Possess knowledge of clinical development organizations, relevant analytics concepts and methods and clinical informatics systems
- Develop predictive and forecasting models to inform operational strategy
- Develop tools for automating data processing, cleansing, and manipulation
- Deliver analytical business solutions to the clinical operations organization
- Lead representative for the sector for the Workbench User Experience Upgrade project
- Ensure IS representation within assigned Process Development functions to develop, support and maintain business and IS strategy
- Coordinate project activities for assigned Process Development functions to design, source and implement new business capabilities around information management as necessary to deliver the strategic plan
- Work across business organizations to create and maintain an integrated approach to process development, manufacturing, and quality, serving as a domain expert in IS technology solutions
- Provide guidance to project teams on defining business needs, articulating solutions and approaches for addressing business needs, and presenting business cases for proposed solutions
- Support robust IS solutions to leverage use of data by the business

Qualifications for business development operations

- Degree in Business or in a related field
- Be a highly motivated individual with strong analytical and quantitative, problem solving, organization, communication and presentation skills
- Have experience in transforming data into compelling insights and strategies
- Have demonstrated ability to identify and synthesize reliable and current information sources into a comprehensive and accurate understanding of business reality
- Have a track record of integrating and synthesizing findings from multiple sources to enable informed strategic decision making and business insights
