

Example of CAD Designer Job Description

Powered by www.VelvetJobs.com

Our company is growing rapidly and is looking for a CAD designer. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for CAD designer

- Maintain good relations with other disciplines and with the client at all time
- Have an understanding of the department checking and approval procedures
- Coordinate construction activities of contractors and mill departments, including observing and inspecting work to ensure project requirements, mill needs, code compliance and safety requirements are met
- Gather technical data and develop solutions with the project manager
- Purge and maintain documentation in the CAD system
- Design and analysis of EKNA technical products and systems using various CAD software
- Draft design of EKNA products in 3D software
- Create quality designs and illustrations
- Responsible for handling off design specifications
- Ensure that design results are in accordance with customer specifications

Qualifications for CAD designer

- Some familiarity with Automotive Mirror products would be valuable
- Some familiarity with GD&T would be valuable
- Some English communication skills would be advantageous (but not mandatory)
- BS Mechanical or Automotive Engineering degree required
- 2+ years of experience in chassis component design and packaging
