

# Example of CIB Tech Job Description

Powered by [www.VelvetJobs.com](http://www.VelvetJobs.com)

Our company is growing rapidly and is hiring for a CIB tech. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

## Responsibilities for CIB tech

- Owning the prioritisation, tracking and implementation of change requests originating from a wide range of stakeholders
- Running regular working group meetings and presenting updates to senior stakeholders
- Partnering with regional and asset-aligned teams to ensure a consistent agenda
- Being able to work under pressure in a changing environment to tight deadlines
- You should clearly document business requirements, decipher true business need from wants, and make recommendations and execute accordingly
- You will establish strong working relationships with business users, technologist partners both locally and internationally
- Partner with stakeholders and end users
- Focus on responsive and intuitive designs
- Develop wireframes
- Help guide projects with performance concerns to understand bottlenecks, propose, implement and deliver enhancements

## Qualifications for CIB tech

- FIX and binary protocol knowledge
- Equities connectivity experience

- Databases and/or data models (Graph databases, ontologies, semantic frameworks)
- Algorithms for data integration / capture
