

Example of Cloud Product Manager Job Description

Powered by www.VelvetJobs.com

Our company is searching for experienced candidates for the position of cloud product manager. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for cloud product manager

- Engage with internal stake holders in completing needs analysis and defining strategic directions as it pertains to Cloud Solutions
- Prior experience building custom applications using Salesforce.com Customer Communities, Customer Communities Plus and Partner Communities
- Strong hands-on experience of Apex and Visual Force
- Experience with agile methodology, data migration, custom object creation, testing and implementation
- 3+ years of end-to-end product management experience on Salesforce.com eco-system
- 2+ years system integration experience with API based architecture
- Proven ability to create functional designs, wireframes, product demonstrations and proof of concepts for rapid prototype development needs to be the key-trade of this individual
- Work together with Development and Engineering and Marketing to set the targeted launch plans and releases supported by capital and resource budget
- Work closely with the service product marketing manager to ensure a complete end to end solution and customer experience (SaaS)
- Work closely with third-party developers (primarily software companies, system integrators) to understand their needs and communicate best practices in using the APIs

Qualifications for cloud product manager

- Pragmatic Marketing Framework Certification or equivalent experience / training
- Previous telecommunication industry experience required
- BA/BS in Computer Science, Information Systems or a related technical field with minimum of 5 years Hardware/Software Consumer Product Management, or other relevant experience
- Experience as a Global Product Owner in an Agile environment (scrum preferred)
- Ability to manage multiple complex projects across cross-functional teams and multiple client groups
- Proven leadership skills capable of motivating and directing a large cross-functional team
