

Example of Cloud Senior Engineer Job Description

Powered by www.VelvetJobs.com

Our company is looking for a cloud senior engineer. To join our growing team, please review the list of responsibilities and qualifications.

Responsibilities for cloud senior engineer

- Testing, deploying, and advocating the use of devops technologies such as Git, Jenkins, Ansible, Terraform, and Packer
- Provides support and issue investigation and resolution for all internal and client facing Cloud-based solutions
- Actively mentors all staff on the proper use of all Cloud-based services
- Provide 24/7 operational support for production network, servers and systems
- Reviews, evaluates, specifies, designs, maintains, and documents system architecture, system configuration, system monitoring and system performance monitoring
- Works directly with NOC, QA and Engineering to trouble-shoot system issues and deliver timely resolutions
- Process and complete simultaneous projects in an accurate and timely fashion
- Support always-available cloud-based software as a service (SaaS) applications
- Make decisions on problem resolutions in critical down time situations when escalation is impractical
- Create, update and share implementation, infrastructure and architectural designs with the organization

Qualifications for cloud senior engineer

- Monitor, configure, and troubleshoot storage (EMC, NetApp, Solidfire)
- Understand capacity management and right-sizing

- 9 – 13 Years with BS in computer science or related field
- Experience with MapReduce and related technologies (Storm, Hive, Pig, Flume)
- At least 2 years of experience with git repository administration
