

Example of CNC Lathe Operator Job Description

Powered by www.VelvetJobs.com

Our company is looking to fill the role of CNC lathe operator. We appreciate you taking the time to review the list of qualifications and to apply for the position. If you don't fill all of the qualifications, you may still be considered depending on your level of experience.

Responsibilities for CNC lathe operator

- Use the check-list to register the required data
- Remove the winding from the CNC lathe, by using generic lifting tools, and place it in the appropriate areas for the next process steps
- Set-up and run Swiss Type machines (Citizen, Tsugami) for production needs
- Make adjustments to tooling by using presetters or by manually touching-off tools
- Understand a shop environment and possess a strong mechanical aptitude
- Perform troubleshooting techniques to resolve machining errors
- Possess the ability to read complicated blueprints and understand GD&T
- Inspect production results and work efficiently to achieve goals
- Maintain safe operations by following safety procedures and regulations
- Use basic measuring equipment including calipers, micrometers, and various gages

Qualifications for CNC lathe operator

- Communicate with others on work order status and completion of work
- Must be able to lift heavy objects, bend, stoop, and stand on feet for long periods of time
- Hair Follicle Drug Test and Background Screening required before start
- Some general manufacturing experience preferred
- Some CNC experience preferred, but not required for the right candidate
