Our innovative and growing company is looking to fill the role of cyber specialist. Thank you in advance for taking a look at the list of responsibilities and qualifications. We look forward to reviewing your resume.

Responsibilities for cyber specialist

- Use security monitoring devices and interpret outputs to identify anomalous traffic and determine the level of escalation
- Identify incidents of associates copying confidential data to removable storage devices, email, or to the internet and take necessary actions to contain the data loss
- Research suspicious emails submitted by associates to determine the validity and origin of the email
- Detect and disrupt threat actors through data analysis, threat intelligence and use of cutting edge methods and technologies
- By mentoring less-seasoned members of our staff, you will help to build a best-of-breed cyber security team
- Keep track of potential security incidents and work with various compliance areas to report the relevant events to external regulators
- Share information and help create a corporate view of cyber and information security status and awareness
- Investigating alerts
- Escalating alerts
- Insure that Cyber Assets are protected by Antivirus/Antimalware applications

Qualifications for cyber specialist

- Property and Casualty Broker's license required, or must be obtained within 60 days of hire

- Experience in external media engagement and social media, including pitching news stories to a variety of print and electronic media outlets
- Experience using graphic design software including InDesign and PhotoShop
- 8+ years of experience selling IT/Info/cyber Security solutions products and services with at least 2 years of professional services sales experience to AU Federal Government
- Security clearance preferred (min NV1 – Secret)
