

Example of Data Analyst Lead Job Description

Powered by www.VelvetJobs.com

Our innovative and growing company is hiring for a data analyst lead. We appreciate you taking the time to review the list of qualifications and to apply for the position. If you don't fill all of the qualifications, you may still be considered depending on your level of experience.

Responsibilities for data analyst lead

- Document and apply remediation actions including the application of hot fixes, Information Assurance Vulnerability Alerts (IAVA), patches or configuration changes
- Coordinate and provide the response to DIACAP data calls
- Interface with software developers and government clients in all environments to maintain system certification
- Leads highest level research, data mining, predictive modeling, and business analytics projects to identify knowledge gaps and learning opportunities
- Presents results, analysis and potential solutions to management and senior leadership at business reviews and/or operational updates
- Conducts complex research and analysis to quantify learning opportunities and challenges and develops formal recommendations for presentation to leadership on how to leverage technology to support learning and related organizational effectiveness
- Oversees complex learning technology initiatives that include various phases and large cross-functional project teams
- Provides information and/or training to end users to help resolve inquiries related to assigned initiatives and/or programs
- Leads and motivates project team members that are not direct reports that may span the entire organization and provides guidance to lower level staff
- Provide support to the FBI and partnering agencies in furtherance of a classified USIC program

-
- Direct experience using SAS, Rational Databases (Oracle, Teradata), or other programming languages to extract, load and transform data into marts or warehouses to support analytics
 - Experience in working on Hadoop platform and tools such as Impala, Hive, Spark, Pig, is a bonus
 - Knowledge of Collections and Recoveries in customer lifecycle
 - Knowledge of SAP Business Objects is desirable but not essential
 - Assist in defining the mission, goals, critical success factors, principles, and policies for Treasury data and information quality
 - Assist in formulating and conducting awareness forums, both formal and informal
