

Example of Data Miner Job Description

Powered by www.VelvetJobs.com

Our innovative and growing company is hiring for a data miner. Thank you in advance for taking a look at the list of responsibilities and qualifications. We look forward to reviewing your resume.

Responsibilities for data miner

- Perform statistical analysis using advanced methods and validation techniques
- Perform data review and data analyses, generate and test working hypotheses
- Work effectively with various groups within HPM
- Strategically drives a broad range of complex data analytics, which may include data analysis and modelling
- Identifies opportunities for spend improvement, develops recommendations, and converts recommendations into compelling new business plans
- Independently executes complex analytics activities at the highest level, processing data, extracting relevant information, driving conclusions and translating analyses into actionable plans
- Completes analyses that support data driven decision making
- Rebalance organization from data collection to value added analysis
- Emphasis on data analysis for predicting, discovery, and prescriptive insights
- Designed automated tools translating information to knowledge

Qualifications for data miner

- 3+ years of hands on experience in extracting data from disparate data sources, transforming and loading into analytical platform ability to comfortably work with raw data from disconnected data sources to clean, blend and analyze

- Proven ability to multi-task without sacrificing quality or deadlines on individual projects
- Requires experience working on multiple projects simultaneously
- Preferred 3 + years' experience in an engineering or manufacturing organization working with various types of documentation including Bill Of Material (BOM) structure
- 5+ years as a data analyst/scientist/miner (in our team we believe these are the same roles)
