

# Example of Data Network Engineer Job Description

Powered by [www.VelvetJobs.com](http://www.VelvetJobs.com)

Our growing company is looking for a data network engineer. We appreciate you taking the time to review the list of qualifications and to apply for the position. If you don't fill all of the qualifications, you may still be considered depending on your level of experience.

## Responsibilities for data network engineer

- Maintaining market data infrastructures and expeditiously applying troubleshooting / problem resolution skills to minimize business productivity loss, customer impact, and financial / reputational risk
- Participating in weekend and off-hours on-call rotations, conducting changes after trading hours, and working on weekends occasionally
- Lead and direct the evaluation of technology in lab environment or writing up findings following the direction of a senior engineer
- Analyze, suggest, and implement methods for orchestration and automation of deployments in network and voice areas
- Respond to incidents and escalate issues as needed
- Create and or manage documentation of our standards, as directed by a senior engineer
- Participate in ITIL processes (primarily configuration, change, incident, problem, capacity & asset management)
- Use your hands-on abilities, working side by side with our people to get things done
- Troubleshoot and resolve mild to complex issues
- Ensure that network documentation (diagrams, MOPs, ) are kept current
