

Example of Data Transformation Job Description

Powered by www.VelvetJobs.com

Our growing company is looking to fill the role of data transformation. Thank you in advance for taking a look at the list of responsibilities and qualifications. We look forward to reviewing your resume.

Responsibilities for data transformation

- Engaging with business sponsors and stakeholders, ensuring broad awareness is achieved and that the communications support strategy is realised
- Being accountable for the governance model across all levels, ensuring key risk and decision points are being raised and resolved
- Monitoring and reporting progress compared to agreed business outcomes, delivery plans and business cases
- Representing the program at relevant forums, such as delivery governance and platform committees
- Focusing on streamlining workflow, emphasising process and automation as the key pillars of each programme
- Creating solutions to meet the business challenge of the real-time availability of all transaction data and positions
- Enabling each Transformational Initiative to meet the objectives and managing the overall data governance structure, pulling together all groups in order to achieve the overall data goals
- Excellent communication and stakeholder management skills, with the ability to build strong working relationships at senior management level (Managing Director / Director level)
- Experience of working in large-scale, transformational programmes
- A strong programme management/delivery background and past focus

Qualifications for data transformation

- A thorough understanding of the financial services industry
- A strong background in a senior product/programme management function
- Excellent written and verbal German language skills would be beneficial
- Independent, flexible and have a proactive work style with a proven record of delivery
- Able to think creatively to solve problems
