

Example of Database Designer Job Description

Powered by www.VelvetJobs.com

Our company is growing rapidly and is looking for a database designer. We appreciate you taking the time to review the list of qualifications and to apply for the position. If you don't fill all of the qualifications, you may still be considered depending on your level of experience.

Responsibilities for database designer

- Assist in developing standard operating procedures for data entry and clinically-relevant quality tests
- Standardize clinical data to common vocabularies and classifications to facilitate collaboration across cancer care institutions
- Be a clinical data expert on our team and support the retrospective and prospective research efforts of oncologists and researchers in the lymphoma service
- Develop detailed and thorough knowledge of OnBase database schema, database operations and database communication layers
- Create white papers from research to support database initiatives
- Review database schema changes and generated queries as needed
- Work with less experienced Database Designers to enforce database standards
- Develop a detailed understanding of the OnBase database schema and database operations for assigned modules
- Collaborate with other development teams to review database queries
- Manage and solve technical changes, issues and concerns of low and medium complexity work with little to no guidance, but requires some guidance for complex work

Qualifications for database designer

- Pitch design solutions to stakeholders, explaining and rationalizing design decisions to non-design audiences
- Work with developers to iterate on designs during implementation
- Prioritize and work in an agile, iterative way
- Have experience in any of the following and proven track record of development, systems integration, and configuration of systems that include either DB2, TSA, WAS, ISAM, Cognos, DataPower
- Previous experience of system multitenancy & working knowledge of database (DB2) design and best practices is highly desirable
