

# Example of DBA-Oracle Job Description

Powered by [www.VelvetJobs.com](http://www.VelvetJobs.com)

Our innovative and growing company is searching for experienced candidates for the position of dba-oracle. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

## Responsibilities for dba-oracle

- Design and automate monitoring and carry out regular tuning as indicated, to measure performance and ensure continuing optimum performance and reliability
- Implement systems performance reviews and action schedules to ensure performance targets are met
- Create and implement more advanced database application programs beyond training / experience of development teams, to enable complex data manipulation
- Maintain and promote awareness of new database functionality as appropriate to and required by the business
- Give 24 / 7 call-out support on all production databases to maximise availability to users
- Stay informed of Oracle patches for bug fixes and recommended upgrades
- Install, upgrade and maintain Microsoft database software
- Create appropriate databases and database structures based on application usage
- Define and implement appropriate utilities to monitor database functions and activity
- Develop and maintain shell scripts

## Qualifications for dba-oracle

- Assign, coordinate and review work of staff
- The successful candidate possesses dynamic leadership capabilities to build and manage a highly effective organization and develop high-performance teams that may be geographically dispersed
- The candidate will have worked for at least 3 years in a large global organisation that had a dedicated DBA team for Oracle
- Experience of 24x7 production support of a database real-estate that contains Oracle, UDB, MySQL and Informatica technologies
