Example of Design Research Job Description

Powered by www.VelvetJobs.com

Our growing company is hiring for a design research. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for design research

- Ensure methodology, data reporting and study deliverables meet specifications, are accurate and high quality
- Bachelor's Degree in marketing or related area with a minimum of 2 years of marketing research or project management experience
- Demonstrated experience in relationship building, consulting and complex problem solving
- Requires strong analytical, organizational, and communication skills (written/verbal/professional)
- Collaborate with a team of design researchers, designers, prototypers, and a multidisciplinary set of stakeholders through the research process
- Be responsible for executing projects of low to moderate complexity
- Ensure methodology, data reporting and study deliverables meet specifications and are accurate and high quality
- Play a significant role in devising and explaining appropriate research design to solve clients' problems
- Develop and manages sample blend and quota structure, offering guidance on final suggestions for clients
- Manage, consult, and communicate solutions to clients or client service teams as appropriate throughout the life of project

Qualifications for design research

- Excellent written, verbal communication and presentation skills - the ability to communicate the reasoning behind your preferred results, methods, and approaches (orally and in writing) with internal clients
- Bachelor's degree in Human-Computer Interaction (HCI), Cognitive Science, Cognitive Psychology, Anthropology, Research Methods or related field
- Bachelor’s degree in Electrical and/or Mechanical Engineering or Computer Science
- Broad range of experience and technical depth that can be applied to a broad range of problems
- Bachelors or Master's degree in UX / interaction design, new media design or related design field or work experience equivalent
