

Example of Design Specialist Job Description

Powered by www.VelvetJobs.com

Our innovative and growing company is searching for experienced candidates for the position of design specialist. We appreciate you taking the time to review the list of qualifications and to apply for the position. If you don't fill all of the qualifications, you may still be considered depending on your level of experience.

Responsibilities for design specialist

- Design, develop, implement and maintain web and mobile applications using the Adobe Creative Cloud, WordPress, HTML 5, CSS, and JavaScript to create and enhance an interactive experience for customers
- Complete projects in a timely and effective manner to ensure that cost and reliability objectives are met
- Participate in Product Development Process (PDP) design reviews for all new product launches to help ascertain the viability of potential product and/or process improvements
- Support product and process improvement activities by participating in cross-functional value stream meetings with Field Service, Manufacturing, and Quality
- Lead the team's design / drafting efforts to implement viable product or process improvements according to the assigned priority using the EC (engineering change) process
- Create and process ECs as needed to support the Sustaining & VAVE engineering team
- Create 3D CAD models of components, assemblies, and/or systems that satisfy the form, fit, and functional requirements of complex mechanical designs
- Prepare accurate 2D prints with appropriate scaling, dimensions, tolerances, details, projections, and views
- Develop and/or modify BOMs in the material requirements planning (MRP)

- Participate in creating a standardized BOM structure for the Engineering department using a “best practices” approach to consolidate the unique BOM structures currently used by the other design teams

Qualifications for design specialist

- Bachelor’s degree in apparel design, Art, graphics or equivalent combination of experience preferred
- Familiarity with Lotta – preferred but not required
- Bachelor's Degree or equivalent, preferably in engineering or other applicable technical field
- Sales, business development, or other relevant experience
- Must be able to handle all aspects of post-production from video editing, animation and design, infographics, storyboards and all post-production creative
- Experience using software and tools such as VoiceThread, Articulate, Camtasia, Captivate, Wikis, to support development and delivery of multimedia learning objects, graphics, presentations, and deliverables
