

# Example of DevOps Engineer Cloud Job Description

Powered by [www.VelvetJobs.com](http://www.VelvetJobs.com)

Our innovative and growing company is looking to fill the role of devops engineer cloud. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

## Responsibilities for devops engineer cloud

- Experience in a DevOps or Cloud Operations role
- Experience in a Hosted Services environment
- Develop continuous delivery and infrastructure automation solutions for various project and operational needs for our customers
- Establish and maintain collaborative working relationships with stakeholders, development and operations communities
- Develop and improve solutions that provide infrastructure services for the business applications, ensuring availability, load balancing, one-button deployment solutions, infrastructure management and troubleshooting
- Perform periodic performance analysis to support capacity planning
- Contribute to and maintain best practices and standards
- Triage production issues along with other operational team members in 24 X 7 and conduct root cause analysis for critical issues
- Configuration management and Release Management
- Developing and Maintaining the Build/Automation scripts

## Qualifications for devops engineer cloud

- Working knowledge of AWS API and a relevant SDK
- Experience managing windows applications with authentication services
- Should have a thorough understanding of proper project management processes, data documentation and AWS design at a very granular level

- Bachelor's Degree in Computer Science or related fields, or military experience
- At least 3 years of experience with projects/products involving complex integrations
