

Example of Digital Solution Architect Job Description

Powered by www.VelvetJobs.com

Our growing company is hiring for a digital solution architect. We appreciate you taking the time to review the list of qualifications and to apply for the position. If you don't fill all of the qualifications, you may still be considered depending on your level of experience.

Responsibilities for digital solution architect

- Ability to exhibit and demonstrate leadership within a given implementation or major change project
- Proven ability to interface with mid/high-level client stakeholders and communicate effectively and at appropriate level of communication / presentation skill
- Experience providing technical leadership to any role(s) required to deliver solution enhancement, modifications, issues management or research for clients
- Demonstrated ability to take detailed, highly technical concepts and present to client in a high-level non-technical fashion and effectively communicate the business benefits of a digital technical solution
- Solid understanding of Pixel, Cookie Based Targeting
- Experience working with Online Media Process and Dataflows
- Experience working with Clients on Strategy for Online Campaigns
- Familiarity with the online ecosystem and digital campaign processes
- Provide technical analysis of user stories and develop technical designs ready for development
- Orchestrate the analysis, requirement development, and design of models with the business to optimize use of data during critical business process execution

Qualifications for digital solution architect

- Support business development activities, as a technology subject matter expert, reporting to the Engagement Partner, Director, or another Senior Consultant
- Obtains formal agreement by stakeholders and recipients to scope and requirements and establishes a base-line on which delivery of a solution can commence
- Facilitates scoping and priority-setting for change initiatives of medium size and complexity
- Strong experience (3-5 years minimum) in working with Demandware or Intershop as a primary eCom platform
- Experience customizing and integrating third party tools into a SaaS platform
- Strong experience in site performance and front end code refactoring for performance optimization
