

# Example of Digital Solution Architect Job Description

Powered by [www.VelvetJobs.com](http://www.VelvetJobs.com)

Our growing company is hiring for a digital solution architect. To join our growing team, please review the list of responsibilities and qualifications.

## Responsibilities for digital solution architect

- Work alongside the wider Architecture team on cross-domain projects and strategies, providing the Digital Architecture Viewpoint
- Work alongside the Product Owners and Delivery Team Leads to review architectural feasibility of the requirements, including Non-Functional Requirements and Security considerations, defining the high-level Solution Outline
- Support the Agile Teams and Third-Party Suppliers throughout the Agile Delivery process by helping to define User Stories, Backlog refinements, Solution Design, development cycles, Test Automation and Continuous Integration/Delivery
- Participate in the relevant scrum events
- Getting involved with the Agile teams to deliver across the entire product life cycle – concept, design, build (code), deploy, test, release, and maintain unit, functional, and performance test automation
- Contribute to, and maintain the Architecture Wiki, ensure oversight of supplier documentation and delivery when required
- Enlighten and support the wider IT functions with technical knowledge and experience of the Digital domain where possible
- Define/select the best in class high-level technical design, assess risks / issues, impact on performance, workload, cost, assumptions, together with Architects specialists, Solution Architects, Functional Owner and Application Development Vendor
- Define technical project approach with Functional Owner and Project Manager

## Qualifications for digital solution architect

- Lead (or be part of the technical leadership team on larger, more complex projects) technology sourcing and selection activities on digital transformation programmes, working with third-party vendors to identify the solution options for digital transformation delivery
- Act as a technology design leader (or be part of the technical leadership team on larger, more complex projects) on digital transformation programmes, heading architectural changes, and maintaining adherence to the agreed digital blueprint
- Basic experience with responsive/adaptive design
- Bachelor or similar in Electro-Mechanic Engineering
- Strong interest in Digital Signage, Cinema and Video
- Strong developed commercial skills, preferably with proven experience
