

# Example of Driver Engineer Job Description

Powered by [www.VelvetJobs.com](http://www.VelvetJobs.com)

Our innovative and growing company is looking for a driver engineer. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

## Responsibilities for driver engineer

- Regularly align with customer (internal / external) for requirements clarification
- Specify technical system requirements derived from customer (internal / external) requirements
- Design, plan and track system architecture
- Create system specifications based on system requirements
- Formulates Safety Goals, Functional and Technical Safety Concepts according ISO26262
- Plan and perform safety/FMEA reviews with customers
- Formulate product variants and product configuration strategies
- Create product variants and product configuration plans and tables
- Support development of system verification strategies
- Support creation of test plans and test specifications

## Qualifications for driver engineer

- Diagnose customer issues and perform bug fixes
- Suggest and implement driver performance optimizations
- Master's degree in science or engineering plus 2 years working experiences in the related areas, or bachelor's degree plus 3 years of working experience
- 2 or more years of Java-based server-side programming experience
- 1 or more years of multi-threading programming experience
