

# Example of Drug Product Development Job Description

Powered by [www.VelvetJobs.com](http://www.VelvetJobs.com)

Our growing company is searching for experienced candidates for the position of drug product development. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

## Responsibilities for drug product development

- Will oversee interactions with contract manufacturing organizations to deliver drug product supplies for clinical development up to commercial registration
- Responsible for oversight and integrity of all Planning, Budgeting & Resourcing System (PBR) processes
- Provide direction and counsel to the Scientific Directors to meet business objectives
- Calculate gaited costs for inclusion in Financial LBE
- The incumbent is expected to operate independently to accomplish the goals and responsibilities of the position
- DP leadership position for pipeline molecules including process development and characterization
- Project leader in commercial drug product technology transfer activities such as, process evaluation, validation documentation writing and review, root cause analysis and risk assessments
- Representing DPDO in cross functional matrix teams as it relates to biosimilar and novel biologic products within Teva
- Interface between DPDO and Sterile Device Technologies (SDT) group
- Involvement in capital projects such as Biological Manufacturing Facility (BMF) at West Chester

## Qualifications for drug product development

- Experience executing formulation, stability, and product characterization studies
- Strong interpersonal skills and the ability to work in a fast paced, multidisciplinary environment
- Demonstrated track record of successful formulation and drug product development, supporting clinical/commercial programs for recombinant protein products, including filing of INDs/IMPDs and BLAs
- Deep technical understanding of all aspects pertaining formulation and drug product development of liquid and lyophilized biological products, including experience with multiple primary packaging configurations and combination products
- The ideal candidate will also have proven experience with contract manufacturing organizations including establishing and managing clinical supply agreements
- Effective communication, collaboration, and negotiation skills
