

# Example of Electrical Design Engineer Job Description

Powered by [www.VelvetJobs.com](http://www.VelvetJobs.com)

Our company is growing rapidly and is looking for an electrical design engineer. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

## Responsibilities for electrical design engineer

- Assist in the process of creating the design, requirements, ICDs and validating the design through the flight certification process
- Analyze, using industry standard tools, new or existing electrical system and component designs for requirement compliance in areas of electrical circuit design, analog signal conditioning, control systems and/or electromagnetic effects
- Compile and analyze test data to determine effect of design on products, systems, or equipment
- Develop or assist in developing specifications for selecting components and equipment to use
- Utilize computer-aided design equipment, develop basic data and make preliminary layouts, sketches, and notes necessary to present design proposal
- Identify design errors, omissions, and other deficiencies, and recommend revisions and/or improvements in design layout to responsible engineers or designers
- Participate in site selection reviews
- Defining requirements so products meet customer needs and expectations
- Ensuring high product performance through the proper hardware component choices
- Qualifying modifications to existing designs through rigorous test standards and processes

- 
- Relatable experience to the responsibilities listed above
  - Degree in BSc Engineering with 10 years of total work experience
  - Minimum of 8 years work experience in refinery / petrochemical industries and 4 years in related designation
  - Bachelor's Degree in Mechanical or Architectural Engineering
  - Minimum 4 years' experience designing building electrical systems in the A/E and construction industry
  - Previous experience in electrical design with CAD tools for industrial projects is appreciated
